<b>Introduction</b> .....	7
<b>1. Measure of a physical quantity</b> .....	9
<b>2. Units and dimensions</b> .....	10
<b>3. Measurement in physics</b> .....	11
<b>4. Measurement uncertainties</b> .....	12
4.1. Systematic uncertainty .....	12
4.2. Random uncertainty .....	13
4.3. Types of measurement uncertainties .....	15
<b>5. Sample size</b> .....	17
<b>6. Errors in measurements</b> .....	19
<b>7. Rounding up, presentation of final results and measurement uncertainties</b> .....	20
<b>8. Averaging of results, weighted mean</b> .....	23
<b>9. Measurement uncertainties of indirect results</b> .....	25
<b>10. Testing the consistency of measurement results</b> .....	29
10.1. Testing the consistency with tabulated results .....	29
10.2. Testing the consistency of results obtained by different methods .....	29
<b>11. Graphic presentation of results</b> .....	30
<b>12. Analysis of linear relations</b> .....	32
12.1. Correlation and correlation coefficient .....	32
12.2. Linear regression .....	33
12.3. Graphical method of presentation of a linear relation .....	36
12.4. Linearization of nonlinear relations .....	39
<b>List of references</b> .....	41
