CONTENTS

PART 1

PENG GAO, LIANGYI ZHAO
Moments and one level density of sextic Hecke L-functions 7

JEAN-FRANÇOIS JAULENT
Sur la trivialité de certains modules d'Iwasawa 29

PARASKEVAS ALVANOS, DIMITRIOS POULAKIS
Bounds for the smallest integral solution of Pell equation over a number field 41

JEAN-PAUL ALLOUCHE, JEFFREY SHALLIT
Additive properties of the evil and odious numbers and similar sequences 55

GABRIEL RAPOSO
A proof of Pohst's inequality 71

ISTVÁN GAÁL
Calculating generators of power integral bases in pure sextic fields . . . 85

PENG GAO, LIANGYI ZHAO
Twisted first moment of quadratic and quadratic twist L-functions . . 101

BHAWESH MISHRA
Almost no finite subset of integers contains a q^{th} power modulo almost every prime 129

PART 2

GUODONG HUA
The distributions of coefficients of triple product L-functions over arithmetic progressions 143

TAKUYA AOKI
On the class numbers of the n-th layers in the cyclotomic $\mathbb{Z}_2$-extension of $\mathbb{Q}(\sqrt{5})$ 165

Michel J. G. Weber
A uniform semi-local limit theorem along sets of multiples for sums of i.i.d. random variables 177

Xun Wang
Density of Rational Points on diagonal bidegree $(1, 2)$ hypersurface in $\mathbb{P}^{s-1} \times \mathbb{P}^{s-1}$ 201

Shraddha Rajkhowa, Nipen Saikia
Theta-function identities of Ramanujan's continued fractions of order fourteen and twenty-eight, partition identities and vanishing coefficients 233

Isao Kiuchi
On sums of sums involving the Liouville function 245

Mikko Jaskari
Applying the Resonance Method to $\mathrm{Re}\left(e^{-i\theta}\log\zeta(\sigma+it)\right)$ 263
