

# Contents

<b>List of symbols .....</b>	<b>9</b>
<b>1. Introduction to X-ray structural analysis soft materials .....</b>	<b>11</b>
<b>2. Fundamental principles of X-ray diffraction of soft materials .....</b>	<b>17</b>
2.1. X-ray scattering theory for atomic systems .....	17
2.2. X-ray scattering theory for complex molecular systems .....	22
2.3. The effect of temperature vibration on X-ray diffraction .....	28
<b>3. Measurements of the scattering of X-rays by complex molecular systems .....</b>	<b>34</b>
3.1. Experimental requirements .....	34
3.2. The cuvette for the study of soft materials .....	40
3.3. High temperature X-ray diffraction applied to the study of soft materials .....	41
<b>4. Data correction procedure .....</b>	<b>42</b>
4.1. Absorption correction .....	42
4.2. Polarization factor .....	43
4.3. Anomalous dispersion of scattering .....	43
4.4. Normalization of scattering intensity .....	44
<b>5. The wide angle X-ray scattering (WAXS) in the liquid benzene tri-derivatives .....</b>	<b>46</b>
5.1. Short-range ordering in liquid 1,3,5-trichlorobenzene at 358 K by X-ray diffraction ..	46
5.2. X-ray diffraction investigations of liquid 1,3,5- <i>tri-tert</i> -butylbenzene at 363 K .....	53
5.3. The binary radial correlations of atoms and molecules in 1,3,5-triphenylbenzene at 473 K .....	59
5.4. The influence of functional groups on the geometry of the phenyl ring .....	65
<b>6. The Lennard-Jones potentials of the liquid benzene tri-derivatives .....</b>	<b>67</b>
6.1. Theorem of energy of the system of many molecules .....	67
6.2. Calculations of the Lennard-Jones 12–6 potential in the parametrization of the Kitaigorodsky .....	68
6.3. The Lennard-Jones 12–6 potentials determined for the liquid benzene tri-derivatives ...	71

<b>7. X-ray studies of the <i>ortho</i>-nitroanisole solution in <i>p</i>-Xylene .....</b>	74
7.1. Determination of the conformation <i>ortho</i> -nitroanisole by the method of Mozzi-Warren .....	74
7.2. An X-ray diffraction study on the coordination shells of the <i>ortho</i> -nitroanisole in <i>p</i> -Xylene solution .....	80
7.3. Final remarks. The application of WAXS in the investigations of binary liquid solutions .....	83
<b>8. X-ray method of detection of neoplastic changes .....</b>	84
8.1. X-ray diffraction study of human serum .....	84
8.2. Definition of the X-ray marker $\Omega_{rig}$ .....	87
8.3. X-ray marker $\Omega_{rig}$ for the samples studied .....	89
<b>9. Abstract and conclusions .....</b>	93
<b>Literature .....</b>	95
